

**Key Messages for the  
New Hampshire Climate Action Plan  
and Its Implementing Partners**

Implementing the NH Climate Action Plan requires Transformational Change.

Implementing the NH Climate Action Plan is imperative for the State's Economic and Environmental Future.

No single entity, or actor, can solve the problem we face. It takes collaboration.

The NH Energy & Climate Collaborative helps coordinate partnerships. The partnerships work collectively to implement the Recommended Actions in the Plan.

Let the Collaborative help tell your story.
