

**Quote from Governor John Lynch on the Annual Progress Review for the  
NH Climate Action Plan**

“Here in New Hampshire, we recognize that climate change poses serious risks to the health of our citizens, to our quality of life and to our economic future,” Gov. John Lynch said. “Working together, we have made great progress on implementing the recommended actions in the New Hampshire Climate Action Plan, however more work needs to be done. We must continue to work together because it is the right thing to do for our environment, and it is the smart thing to do for our future.”
