

*The NH Energy & Climate Collaborative is sharing success stories on our progress toward implementation of the state's Climate Action Plan. Learn more about one of our partners!!*

## The 1785 Inn & Restaurant North Conway, New Hampshire

The 1785 Inn conserves energy through the use of CFLs, Energy Star appliances and a new energy efficient burner. They collect rainwater for landscaping needs, landscape with perennials and offer guests a towel and linen reuse option. The inn is active in recycling and composting, properly disposes of hazardous waste and share their commitment to the environment with employees and guests. They also grow produce for their restaurant in season. The 1785 Inn estimates over \$4,200 in energy savings and 62,000 lbs of greenhouse gas emissions due to lighting and LED signs annually.

The NH Energy & Climate Collaborative collects and shares stories on progress toward implementing the recommendation in the State Climate Action Plan. To read more stories, visit us at:
